Introducing ACERO™

The Most Specialized Software for Your Industry

ACERO was designed with over 30 years of experience in the metals, construction, and distribution industries. Generic ERP systems cannot match the familiar flow and industry terminology found in Acero Solutions' specialized enterprise software. Discover today why ACERO is software that fits.

ACERO was designed to meet the needs of roll-formers, service centers, fabricators, building material manufacturers, project manufacturers, and general distributors.

We understand the needs and complexities of your industry.

Key Features and Benefits

- ◆ Multi-user environment supports individual user accounts and personalized security settings, improving data protection and employee accountability.

- ◆ Modular design ensures software features are tailored specifically to your company's needs.

- ◆ Inventory your parts or coils with a system designed to work with all units of measurement, variable length parts, configurable products, and fabricated building systems with complex bills of materials.

- ◆ Improve sales and customer service with ACERO's efficient order entry system, allowing rapid data entry of stock and make-to-order products with real-time inventory information.

- ◆ Combine multiple sales orders and material transfers on a single, multi-stop shipment with ACERO's flexible Shipping Manager.

- ◆ Cut purchase orders for materials and services and receive shipments directly into inventory.

- ◆ Roll-formers and service centers can minimize scrap and maximize production efficiencies by utilizing ACERO's steel optimization tools.

- ◆ Managing prices is easy with ACERO's sophisticated pricing system. Set list prices for products and specify individual discounts and prices for your customers and jobs.

- ◆ Oversee large-scale, multi-stage projects using ACERO's Project Management system.

- ◆ Apply payments and create invoices and credit memos easily through ACERO Accounts Receivables.

- ◆ Streamline business processes and eliminate redundancies by automating paper-driven processes.

- ◆ Leverage ACERO's compatibility to integrate with third party CAD programs and accounting systems.

> After an extensive search for a software package, Phillips was torn between three generic ERP vendors. We knew that 50% of what these ERP vendors offered didn't fit our needs. Thankfully, we found ACERO. After seeing their demo, we made our decision immediately.

— Christine Woodward, CFO
  Phillips Manufacturing Co.

Dedicated Focus We speak your language, understand your industry, and promote and support the industry's best practices.

Industry Experience Acero Solutions has over 30 years experience providing software and support for your industry.

Smooth Implementation ACERO is easy to install, learn, and use. Our software will win the support of your entire organization and provide your company with immediate business results.

Competitively Priced Save significantly without the need for major customizations and take advantage of flexible licensing and payment options.

Proven Technology ACERO is built with the proven performance, scalability, and stability of Microsoft technologies.

Cutting-Edge Features We're always working on improvements and additions to our software, such as ACERO for Windows CE, which allows users to ship materials, report production, and audit inventory using portable hand-held RF devices.

> I have been involved with several system implementations over the last seventeen years. I can honestly say CEMCO's conversion to ACERO was the smoothest of all. The two key items required for a successful implementation, user training and user functionality, were addressed superbly.

— Jim Needham, MIS
  California Expanded Metal Products Company (CEMCO)
